HEMOCHROMATOSIS
PROCEEDINGS OF THE FIRST INTERNATIONAL
CONFERENCE*

Editors and Conference Organizers

LEWIS R. WEINTRAUB, CORWIN Q. EDWARDS, AND MARGARET KRIKKER

CONTENTS

Opening Remarks. By MARGARET ANN KRIKKER	ix
--	----

Part I. Genetics of Hemochromatosis

Historical Overview of Hemochromatosis. By THOMAS H. BOTHWELL and ROBERT W. CHARLTON	1
Genetics of Hemochromatosis: HLA Association and Mode of Inheritance. By MARCEL SIMON, JACQUELINE YAOUANQ, RENEE FAUCHET, JEAN-YVES LE GALL, PIERRE BRISSOT, and MICHEL BOUREL	11
Is All Genetic (Hereditary) Hemochromatosis HLA-Associated? By L. W. POWELL, M. L. BASSETT, E. AXELSEN, J. FERLUGA, and J. W. HALLIDAY	23
Idiopathic Hemochromatosis: Significance and Implications of Linkage and Association to HLA. By JEAN-MARC LALOUEL and LYNN B. JORDE	34
Sporadic Porphyrria Cutanea Tarda in Individuals with HLA-linked Hemochromatosis Allele(s): Preliminary Report. By CORWIN Q. EDWARDS, LINDA M. GRIFFEN, MARK H. SKOLNICK, and JAMES P. KUSHNER	47
The Promoter Region of the Human Transferrin Receptor Gene. By JOHN L. CASEY, BRUNO DI JESO, KRISHNAMURTHY RAO, TRACEY A. ROUAULT, RICHARD D. KLAUSNER, and JOE B. HARFORD	54

Part II. Regulation of Cellular Iron Metabolism

Role of Transferrin Receptors and Endocytosis in Iron Uptake by Hepatic and Erythroid Cells. By EVAN H. MORGAN and ERICA BAKER	65
--	----

* This volume is the result of the First International Conference on Hemochromatosis, which was held by the New York Academy of Sciences on April 27-29, 1987, in New York, New York.

The Role of Liver Endothelium in the Transfer of Iron from Transferrin to the Hepatocyte. By MEHDI TAVASSOLI	83
Iron Metabolism in Isolated Liver Cells. By PHILIP AISEN	93
Ferritin and Cellular Iron Metabolism. By JUNE W. HALLIDAY and LAWRIE W. POWELL.....	101
The Ferritin Genes: Structure, Expression, and Regulation. By HAMISH N. MUNRO, NAZNEEN AZIZ, ELIZABETH A. LEIBOLD, MARY MURRAY, JACK ROGERS, J. KEITH VASS, and KRISTIN WHITE	113
Regulation of the Distribution of Tissue Iron: Lessons Learned from the Hypotransferrinemic Mouse. By JERRY KAPLAN, CATHERINE CRAVEN, JAMES ALEXANDER, JAMES KUSHNER, JAMIE LAMB, and SELDON BERNSTEIN	124
The Effects of Various Transferrins on Iron Utilization by Proliferating Cells. By PAUL A. SELIGMAN, CHRISTOPHER CHITAMBAR, MICHAEL VOSTREJS, and PATRICK L. MORAN	136
Mechanisms and Regulation of Intestinal Iron Absorption. By T. J. PETERS, K. B. RAJA, R. J. SIMPSON, and S. SNAPE	141
Observations on the Release of Iron from Cells. By HELMUT A. HUEBERS, GAETANO BERGAMASCHI, BYOUNG-KOOK KIM, and CLEMENT A. FINCH	148

Part III. Pathogenesis of Cellular Toxicity of Iron

Lipid Peroxidation in Experimental Hemochromatosis. By BRUCE R. BACON, GARY M. BRITTENHAM, CHANHO H. PARK, and ANTHONY S. TAVILL	155
Experimental Iron Overload: Ultrastructural Studies. By THEODORE C. IANCU and HANNA SHILOH	164
Collagen Biosynthesis in Iron Overload. By LEWIS R. WEINTRAUB, ANTHONY GORAL, JOSEPH GRASSO, CARL FRANZBLAU, ALBERT SULLIVAN, and SUSANNE SULLIVAN	179

Part IV. Clinical Problems in Hemochromatosis

Control of Iron Absorption in Hemochromatosis: Mucosal Iron Kinetics <i>in Vivo</i> . By GORDON D. McLAREN, MICHAEL H. NATHANSON, ALLAN JACOBS, DAVID TREVETT, and WILLIAM THOMSON	185
Noninvasive Methods for the Early Detection of Hereditary Hemochromatosis. By GARY M. BRITTENHAM	199
Abnormalities in Estrogen, Androgen, and Insulin Metabolism in Idiopathic Hemochromatosis. By WOLFGANG STREMMEL, CLAUS NIEDERAU, MICHAEL BERGER, HANS-KUNO KLEY, HANS-LUDWIG KRÜSKEMPER, and GEORG STROHMEYER	209
The Arthropathy of Hemochromatosis: Recent Studies. By H. RALPH SCHUMACHER, PABLO C. STRAKA, MARGARET A. KRIKKER, and ANDREW T. DUDLEY	224

Cardiac Abnormalities in Primary Hemochromatosis. <i>By</i> A. DABESTANI, J. S. CHILD, J. K. PERLOFF, W. G. FIGUEROA, H. R. SCHELBERT, and T. R. ENGEL	234
Survival and Causes of Death in Hemochromatosis: Observations in 163 Patients. <i>By</i> GEORG STROHMEYER, CLAUS NIEDERAU, and WOLFGANG STREMMEL	245
Screening for Hemochromatosis in Healthy Blood Donors: Preliminary Results. <i>By</i> CORWIN Q. EDWARDS, LINDA M. GRIFFEN, CHARLES DRUMMOND, MARK H. SKOLNICK, and JAMES P. KUSHNER	258
Screening for Hemochromatosis. <i>By</i> M. L. BASSETT, J. W. HALLIDAY, S. BRYANT, O. DENT, and L. W. POWELL	274
The Effect of Iron Fortification of the Diet on Clinical Iron Overload in the General Population. <i>By</i> K. SIGVARD OLSSON, JAN SÄFWENBERG, and BERND RITTER	290
Iron Inhibits the Nonspecific Tumoricidal Activity of Macrophages: A Possible Contributory Mechanism for Neoplasia in Hemochromatosis. <i>By</i> RALPH GREEN, INMACULADA ESPARZA, and ROBERT SCHREIBER	301
Iron, Iron-binding Proteins and Immune System Cells. <i>By</i> MARIA DE SOUSA, FERDINAND BREEDVELT, ROSELYNN DYNESIUS-TRENTHAM, DAVID TRENTHAM, and JEAN LUM	310
Unsolved Problems in Hemochromatosis. <i>By</i> WILLIAM H. CROSBY	323

Poster Papers

Idiopathic Hemochromatosis in an Afrikaner Population. <i>By</i> T. E. MEYER, R. D. BAYNES, T. H. BOTHWELL, D. BALLOT, T. JENKINS, P. L. JOOSTE, E. D. DU TOIT, and P. JACOBS	328
The Spectrum and Role of Iron Overload in Sideroblastic Anemia. <i>By</i> SYLVIA S. BOTTOMLEY	331
Stimulation of Iron Transport by Polyhalogenated Hydrocarbons and Commercial Flame Retardants in the Intestine of Experimental Animals. <i>By</i> JAMES MANIS	333
Intestinal Absorption of Iron in Patients with Hemochromatosis. <i>By</i> HERTA SPENCER, STEPHEN J. SONTAG, JEANINE DERLER, and DACE OSIS	336
Juvenile Hemochromatosis. <i>By</i> J. P. KALTWASSER, K. P. SCHALK, and E. WERNER	339
Iron-59 Retention Kinetics during Exhaustive Phlebotomy Treatment of Hereditary Hemochromatosis. <i>By</i> E. E. GABBE, R. F. FISCHER, and H. C. HEINRICH	342
Iron-induced Changes in T Cell Populations in Rat Synovium. <i>By</i> MARIA DE SOUSA, ROSELYNN DYNESIUS-TRENTHAM, and DAVID E. TRENTHAM	346

Hereditary Hemochromatosis (HH) in the North of Portugal: 1. Preliminary Characterization of First 15 Cases. <i>By MARIA DE SOUSA, GRAÇA PORTO, JOSÉ FRAGA, BERTA MARTINS DA SILVA, ROSA LACERDA, CARVALHO SANTOS, DANIEL SERRÃO, AMÉLIA SALGADINHO, and CORÁLIA VICENTE</i>	349
Hereditary Hemochromatosis (HH) in the North of Portugal: 2. HLA Haplotypes Found in First Six Families Studied. <i>By GRAÇA PORTO, BERTA MARTINS DA SILVA, CORÁLIA VICENTE, HELENA BRANCO, JOSÉ FRAGA, JOSÉ M. SOARES, and MARIA DE SOUSA</i>	352
Seasonal Siderosis in Svalbard Reindeer. <i>By B. BORCH-IOHNSSEN, K. S. OLSSON, and K. J. NILSSEN</i>	355
The Diagnostic Significance of Bone-Marrow Iron in Hereditary Hemochromatosis. <i>By JOCHEN DÜLLMANN and UWE WULFHEKEL</i> ..	357
Localization of Iron in the Hepatic Acini and in Bile Duct Epithelium as a Tool for Estimation of Liver Iron Overload. <i>By J. W. SINDRAM and J. J. M. MARX</i>	361
Effects of Nontransferrin-bound Iron on the Aggregation and Adhesion of Polymorphonuclear Granulocytes (PMN). <i>By I. M. HOEPELMAN, J. VERHOEF, and J. J. M. MARX</i>	363
Decreased Hepatic 5-Aminolevulinate Dehydrase in Experimental Hemochromatosis. <i>By HERBERT L. BONKOVSKY, JOHN F. HEALEY, BETH LINCOLN, BRUCE R. BACON, and DAVID F. BISHOP</i>	365
Index of Contributors	369

Financial contributions were received from^a:

- AMERICAN LIVER FOUNDATION
- BIOMAGNETIC TECHNOLOGIES, INC.
- THE HEMOCHROMATOSIS RESEARCH FOUNDATION, INC.
- HOFFMANN-LA ROCHE, INC.
- MARCH OF DIMES BIRTH DEFECTS FOUNDATION
(GRANT NO. 4-198)
- MERCK SHARP & DOHME RESEARCH LABORATORIES
- METPATH, INC.
- NATIONAL INSTITUTE OF DIABETES AND DIGESTIVE AND
KIDNEY DISEASES/NIH

^a An additional contribution was received from the family and friends of the late Craig Hamilton Reedy, a 27-year-old victim of hemochromatosis.

The New York Academy of Sciences believes it has a responsibility to provide an open forum for discussion of scientific questions. The positions taken by the participants in the reported conferences are their own and not necessarily those of the Academy. The Academy has no intent to influence legislation by providing such forums.
